

# User Manual

## Accessing the System

In order to deploy our system, you need a Windows hosting server with Mssql support. First you need to upload files to Server via FileZilla, then you need to access to the server's database and upload our database too.

## Main features

### 1- Searching a Book

After you login you can see the search bar on the top of the page. You can easily write and search the name of the book you looking for.

### 2- Searching a Category

After you login you can see the categories tab on the left. You can look these categories and their contents as you like

### 3- Creating a Library

If you want to collect the book you have read or the books you will read you can easily press "create a library" button on the top left corner on the page. You can also add a bok to you library on the book's page.

### 4- Making a Comment

If you want tos hare you opinions about the book with other users you can easily type you comment to the comment section below the book and share it by pressing "share" tab.

### 5- Publishing a Book

If you want to share your book you can easily do that by clicking the "publish a book" button on you profile section. After you filling the informations about your book and when our moderators approve it your book will be on our system.

# Walkthrough

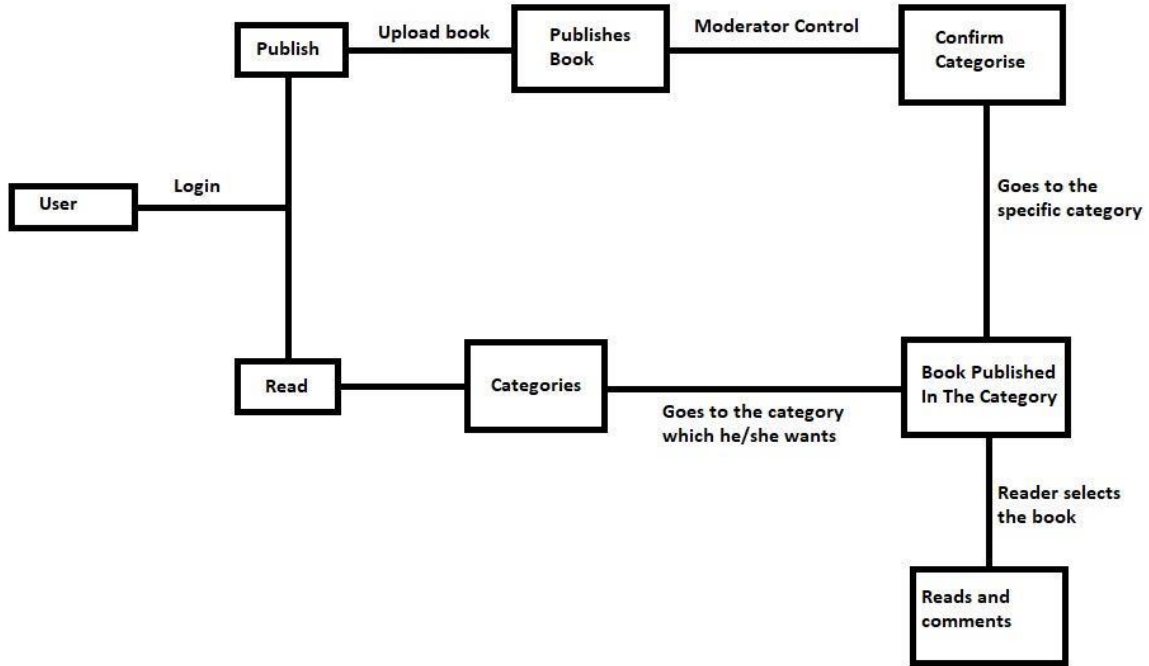

After visiting our website you can easily access our system by using your e-mail and your password. If you are not a user you can easily create your account. After login you can see the main page. There are some books that reading most this week. On the top there is a search button. On the left side there is a categories tab. You can pick any category by clicking it. On the top right corner there is a profile and publish a book tab. If you click the publish a book tab you will see some information blanks about the book you want to publish. After filling these blanks you can press publish button and when our moderators approve it your book will be on our system and other users can read it. If you go to your profile page there are some things you can do. For example you can add/change your profile picture. You can add information about yourself. You can see your libraries and your books and you can edit these if you want.

## Walkthrough on Additional Scenarios

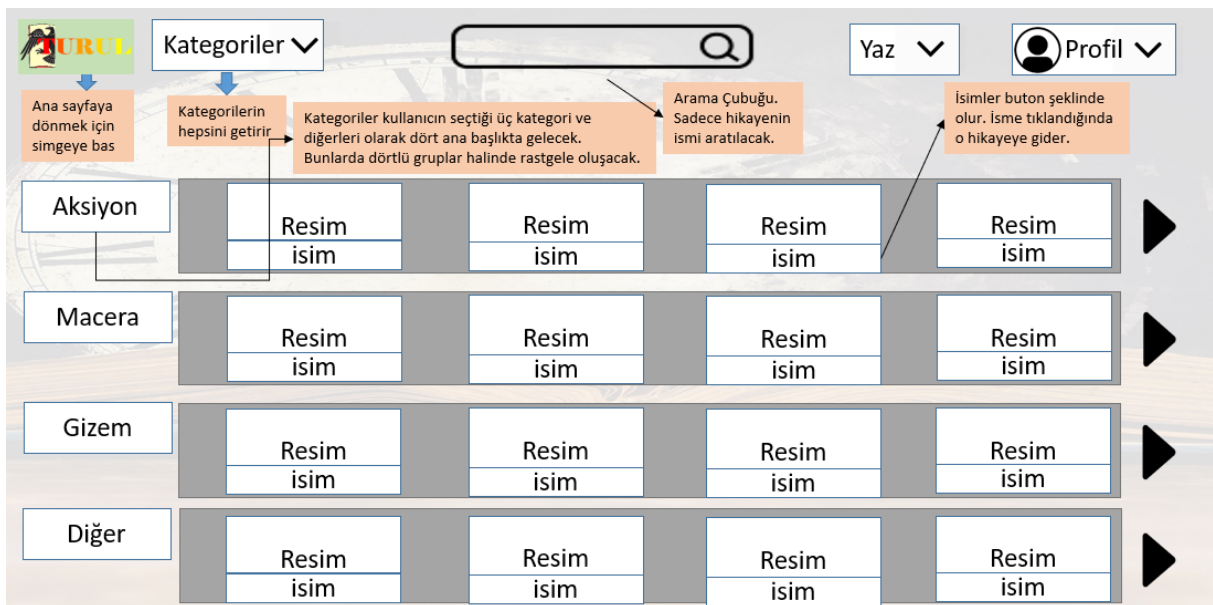

You can easily add other users as friends and after they accept it you can send messages to them. You can create chat rooms up to 50 people if you want. If you publish at least 1 book you can create video conferences with your readers as a digital fan meeting. You can see news about literature on our news feed on the main page.
