Epic Story

      As a person who likes to read, I cannot always find the book I want easily. When I heard of a platform that could solve my problem, I signed up immediately. so I could easily find the books I wanted or a genre I was interested in. after a while I decided to archive the books I had read and thus created my own online library. this has been very beneficial for me because sometimes I cannot find every book I want or my house may run out of space. After a while, while exploring the site, I discovered that I could share my ideas by commenting on the books I read. As a person who likes to share my thoughts, I liked this feature very much and I started commenting on books. I met people who I have in common with and thus acquired a new environment. I always had the idea of sharing my amateur articles while reading a book. I wanted to give myself a chance one day and I decided to collect these short articles and share them on the site. I made a request for the publication of my book by filling in the necessary information. after a while my book was published on the platform. Although a number of people read it for the first few days, after a while the comments made by people attracted new readers. thousands of people were reading my book now and their comments made me very happy. I have to say that every person who likes to read should be on this site.

Searching a Book

As a mom I like reading boks so much so I registered to Di-Lib system and I can search and find my favorite books and I can read them. This makes me save a lot of time to find a book and save a lot of space in my home because all of this is digital.

Searching a Category

I am a middle age man who likes reading books since childhood. Sometimes my work become so much and I can't find any time to look new books to read so I registered on Di-Lib and my life is changed. I can find any category on the system and select a book as I like in my home. With that I don't need to go to a book store to find new books and new genres.

Creating a Library

I am a student who likes to collect different books of a different series. I can call myself a collector. But it can be a difficult thing because sometimes I can't find the books I want or some books are not being printed anymore. This makes my hobby very unplesant. That is why I joined the Di-Lib. On the system I can find every book a want and I can build my own digital library. I can collect the books I looking for easily. Di-Lib helped me a lot.
Story priority : Medium

Making a Comment

I am a critic of a some newspaper. I am sharing my own comments on my page. But my comments can not be read by majority. Not everyone is reading the newspaper that I write. When I heard I can share my comments on Di-Lib I registered the system so now I can share my comments about the books on my page and with that I can reach much more people than newspapers. This is a whole new level for my job.

Publishing a Book

I am a amator writer. For many years I wrote many books but none of them has been published. Publishers didn't like my books or they think they couldn't earn much money. This made me very upset for many years. But some time ago I heard a app that named Di-Lib. I found I can publish my books on the system online and I registered and published my books. People loved them. They posted thousands of good review to my books. With the help of Di-Lib I published my books.
